Seven lakhs (700,000) forms of living beings with water as its body

Seven lakhs (700,000) forms of living beings with fire as its body

Seven lakhs (700,000) forms of living beings with air as its body

Out of eighty four lakhs (8.4 million) forms of living beings, if I may have hurt any living beings, have caused others to hurt them, encouraged others to hurt them, or praised those who hurt them, either by thought, words, and/or actions, I ask forgiveness for all such sinful activities. I forgive all living beings, may all living beings forgive me, I am friendly to all, I have enmity for none.

Explanation:-

In this verse, why is it that there are total of only 8.4 million number of wombs (yonis) counted?

There are infinite numbers of wombs present. However the groups of wombs with similar color, odor, taste, touch and shape are considered as one type. Thus the numbers of wombs are counted as 8.4 million.

How is the number of species determined in each type of living being?

In each kind of living beings the type of species are halved in hundred. Each specie will have 5 types of colors (black, green, red, yellow and white), two types of odors (pleasant and foul smelling), five types of tastes (hot, bitter, rusty, sour and sweet), eight types of touches cold, warm, soft, hard, large/heavy, small/light, smooth and rough) and 5 types of shapes (triangle, square, rectangle, round and oval). By multiplying all the factors the final number of specie is determined.

For example, earth bodies are 700,000. Halved in hundred of this number is 350. Multiplying this number with all the other factors: $350 \times 5 \times 2 \times 5 \times 8 \times 5 = 700,000$. The exact source of how the numbers 700, 500, 350 200 and 100 are derived is not clear.
